Compact Fluorescent Lights*

Using Compact Fluorescent Light Bulbs (CFLs) is an easy way to save energy. Incandescent bulbs typically last about 1,000 hours and waste about 90% of their energy generating heat. CFLs will last 8 to 10 times longer and deliver up to 7 years of light while using just ¼ the energy of traditional lighting. With CFLs, you enjoy greater energy efficiency, and purchase fewer replacement bulbs.

Modern Electric Water Company will give a \$2 rebate for Energy Star CFL interior and exterior bulbs (tax is excluded). The limit per household is six CFL bulbs. A rebate form and receipt must be submitted and approved by Modern Electric Water Company before rebates will be paid.

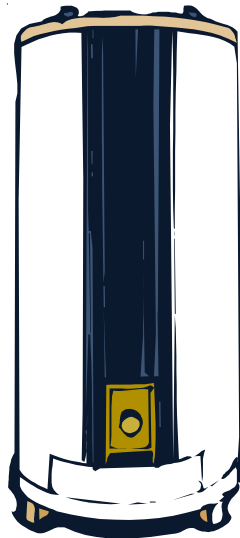

Electric Water Heaters*

It takes energy to heat water. Our electric water heater rebate program is based on the energy factor (EF) and a minimum 10 year warranty. A \$75 rebate will be given for the following EF and tank sizes:

- EF .89 or higher for a 80 gallon DHW
- EF .91 or higher for a 65 gallon DHW
- EF .93 or higher for a 50 gallon DHW
- EF .94 or higher for a 40 gallon DHW

A list of qualified manufactures and model numbers is available in our office. A rebate form including proof of purchase and installation must be submitted and approved by Modern Electric Water Company before rebates will be paid.

Energy Star Air Source Heat Pumps*

To qualify for a rebate the air source heat pump must be an Energy Star unit with an electric forced air furnace. A contract must be sign by the property owner and MEWCO for the rebate to be processed, inspected by MEWCO, and paid. The rebate amount for new installation and replacement is \$250. Replacement for ENERGY STAR Central Air Conditioner is \$100.

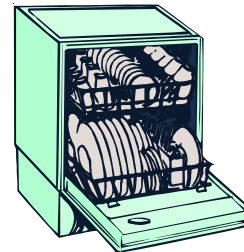

Energy Star Clothes Washers*

A rebate form including proof of purchase and installation must be submitted and approved by Modern Electric Water Company before rebates will be paid. The rebate amounts for Energy Star clothes washers are:

- \$50 for Energy Star Front Load with Electric Water Heater
- \$25 for Energy Star Top Load with Electric Water Heater
- \$25 for Energy Star Front Load with Gas Water Heater
- \$12.50 for Energy Star Top Load with Gas Water Heater

Energy Star Dishwashers*

The Energy Star dishwasher **must use an electric hot water heater** to qualify for the rebate. Gas water heaters do not qualify for the rebate. A rebate form including proof of purchase and installation must be submitted and approved by Modern Electric Water Company before rebates will be paid. The dishwasher rebate amount is \$25.
