

MODERN ELECTRIC WATER COMPANY'S LIST OF BACKFLOW ASSEMBLY TESTERS FOR 2017

The following Washington State Certified Backflow Assembly Testers have requested that Modern Electric Water Company include them on this list. This is just a partial list of testers in the area who are qualified to test backflow preventers. We suggest securing several estimates for testing your Backflow Assembly(s). If your test fails, not all testers are certified to make a repair, it is a good idea to ask if your tester is also certified to repair a failed device.
